Personal AI Assistant - Test Document

Section 1: Introduction

This is a short sample document created for testing the PDF reading feature.

It contains a few sections with simple text.

Section 2: Features

- The assistant can load this PDF.

- It can inject the text into the chat context.

- You can then ask questions about the content.

Section 3: Conclusion

If the assistant works correctly, it should be able to summarize this document

or answer questions like "What is listed under Features?".
